# PROFOUND

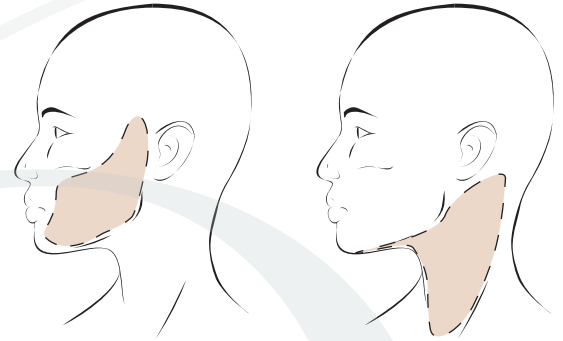

RF MICRONEEDLING SKIN TIGHTENING & FAT REMOVAL

## ABOUT TREATMENT

---

Combining radiofrequency energy and microneedling to stimulate collagen production deep within the skin. Profound reaches the dermis, where collagen and elastin fibers originate, triggering your body's natural healing process to lift, tighten, and rejuvenate from the inside out.

## BEFORE TREATMENT

---

- **Sun Avoidance:** This is important leading up to your treatment. We cannot treat patients who have an active sunburn or have too much recent sun exposure.
- **Numbing Cream:** A good layer of numbing should be applied to the treatment area 60-90 minutes prior to treatment.
- **Valtrex:** Let us know if you have a history of cold sores. Patients should be on a preventative five-day course of anti-viral medication that starts the day before your treatment to avoid a cold sore break out.
- **Bleaching Cream:** Many patients will be prescribed some form of a bleaching regimen leading up to their treatment. Use as directed by your provider leading up to appointment.

## AFTER TREATMENT

---

- As per your provider. Additional aftercare info will be provided.

## POSSIBLE SIDE EFFECTS

---

- **Common:** Redness, swelling, crusting, itching
- **Rare:** Scarring, hyperpigmentation, cold sores, infection

**Suggested Products:** Tizo3 or EltaMD UV Clear or UV Daily spf, Vaniply Ointment, Elta MD PM Therapy, Elta MD Foaming Facial Cleanser.
