# THREAD LIFT

SLOW DISSOLVING SURGICAL "LIFT" ALTERNATIVE

## ABOUT TREATMENT

---

Threads are a nonsurgical alternative for a neck or lower face lift. Thread lifts help to pull or lift skin to help ease the effect of wrinkles, folds, and jowling. Recent improvements in products have made thread lifts significantly more reliable, consistent, and longer lasting compared to more traditional thread lifts. This makes threads a great option for subtle lifting when more dramatic face or neck lift plastic surgery is not needed or wanted.

## BEFORE TREATMENT

---

- **Arnica Montana:** If you have a history of bruising with injections. This is a supplement that can help prevent or lessen bruising should be started day(s) prior to treatment for best effect.
- Discontinue preventative Aspirin or blood thinners two weeks prior to appointment (check with your prescribing doctor prior to discontinuation).

## AFTER TREATMENT

---

- Icing after your procedure in 15 minute on, 15 minute off intervals for the first 24 hours can help with swelling or pain.
- Makeup can be applied immediately after procedure if desired. For bruising a good concealer.
- Avoid Exercise for 24 hours post treatment.
- Avoid heat based lasers for 2 months post treatment.
- Wear a Zinc-Titanium based physical sunscreen. UVA sun rays break down collagen, and can shorten the life expectancy of Threads Lifts. Help protect your investment.
- Gently massage any puckering with moisturizer in a circular motion for 2 minutes. Repeat 3 times a day.

## MONITOR FOR THE FOLLOWING

---

- **Major Asymmetry:** While minor asymmetry should be expected and will resolve with time, more obvious asymmetry may occur and typically requires additional threads to be placed. Please contact office if major asymmetry occurs.
- **Extrusion/puckering:** This is when one of the placed threads does not properly engage with the skin.

## POSSIBLE SIDE EFFECTS

---

- **Common:** Redness, swelling, bruising, and pain
- **Rare:** Scarring, extrusion, allergic reaction, bleeding, infection and asymmetry requiring further treatments

**Suggested Products:** Arnica Montana EltaMD Foaming Facial Cleanser, Tizo3 spf, EltaMD UV Clear or UV Daily spf.
