CO₂ SMALL LASER

SMALL AREA FRACTIONAL ABLATIVE RESURFACING

ABOUT TREATMENT

Carbon Dioxide (CO₂) laser resurfacing offers the most dramatic results for fine lines and wrinkles, skin texture and tone, pigmentation and skin tightness. The most comprehensive laser treatment offered. A combination of deep collagen stimulation and surface level resurfacing leaves you with beautiful new skin. Takes 5-10 years off your appearance! This is the perfect treatment for individuals who want dramatic results.

HOW TO SCHEDULE & VISIT LAYOUT

- Decide on time of year to have treatment. Considerations below.
 - 7-10 days off from work required
 - 2 week strict sun avoidance
 - 1 month limited sun exposure with strict sun protection when outside.
 - 4 weeks prior to any important events.
 - You will need an escort to and from your appointment.
- Scheduling:
 - Contact office at 385-273-3376 and request to speak with the COSMETIC NURSE
 - Provide a date range you are hoping for (see considerations above)
 - Cosmetic nurse will schedule you.
- Payment:
 - \$500 required to book appointment
 - Remaining balance due at Pre-Op Visit
- Visit Layout:
 - Pre-op visit. 30 minute visit. Typically 2 weeks (12-18 days) before treatment date. Provider may opt to do all pre-op items at initial consultation dependant on multiple factors.
 - Treatment Day. 4 hour scheduled slot.
 - Post-Op Visit. 30 minute visit. Typically 3-6 days after treatment day.

PRE-OP VISIT (IF NECESSARY)

- Baseline photos will be taken. Please come without makeup and jewelry.
- Medications will be prescribed.
- You will receive your numbing cream.
- We review treatment expectations, prep, and aftercare.

POSSIBLE SIDE EFFECTS

- **Common:** Redness, swelling, bruising, crusting, itching,
- **Rare:** Scarring, hyperpigmentation, cold sores, infection, hypopigmentation

SMALL AREA FRACTIONAL ABLATIVE RESURFACING

2 WEEKS BEFORE TREATMENT

- Arrange escort: This person will be assuming responsibility for you and cannot be a bus, taxi, or uber/lyft. It's also helpful to have someone stay with you and assist you for the first night if possible.
- Stop skin irritants 2 weeks before: Examples: Retin-A, retinols, glycolic acid, salicylic acid, Vitamin C, etc.
- Fill prescriptions: Prescriptions will be given at pre-op visit. Fill these before treatment day and pick up Vaniply Ointment.
- Sun Exposure: Try your best to avoid sun exposure as much as reasonably possible.

DAY BEFORE TREATMENT

- Start taking your antiviral (typically valacyclovir) & antibiotic as instructed by your physician.
- Prepare home: Older sheets, pillowcases and bedding on bed.
- Prepare vinegar soaks (see below)

MORNING OF TREATMENT

- Eat a light meal.
- Have hair washed, without product, and pulled back from face. Wash face with gentle cleanser.
- Do not wear makeup. NO MASCARA, EYELINER, OR EYELASH EXTENSIONS.

1 HOUR BEFORE TREATMENT

- If prescribed, take recommended sedatives, as instructed by your physician.
 - For all other medications, take as instructed by your physician.
- Apply numbing cream.

GENERAL AFTERCARE - HOW TO CLEANSE PROPERLY

- Washing will be done 3-4 times daily. (breakfast, lunch, dinner, and before bed)
- Adjust water to lukewarm, do not use any hot water during the healing process.
- Wash hands thoroughly.
- Put approximately 4-5 pumps of Gentle Cleanser onto your fingertips, and lightly pat the entire treated area. (NO RUBBING OR SCRUBBING)
- Lean over the sink and gather the water from the running tap into your cupped hands and apply gently to treated areas. Repeat 4-5 times.
- Some ointment may remain, or you may feel some "grease". This is okay.
- Gently press a clean towel to the treated areas and slowly remove.
- You may shower the days following your procedure, but be sure not to allow water to directly hit treated areas. No hot showers for 2 weeks. Baths are not recommended for 2 weeks.
- If you typically shave your face, avoid shaving with a blade for 3 weeks. An electric shaver may be used after 2 weeks.

CO₂ SMALL LASER

SMALL AREA FRACTIONAL ABLATIVE RESURFACING

GENERAL AFTERCARE - VINEGAR SOAKS MIXING INSTRUCTIONS

- What you will need:
 - Distilled Water 1 Gallon
 - Plain White Vinegar
 - Clean spray bottle
 - Clean bottle / bowl with lid for storage.
- Mix 1 Cup white vinegar with 1 gallon distilled water.
- Pour into Spray bottle
- Store spray bottle and remaining mixutre (if any) in fridge.

GENERAL AFTERCARE - EXPECTATIONS

- EXPECT: Oozing and bleeding immediately after the treatment.
- EXPECT: Treated skin will appear to have pattern of laser marks.
- EXPECT: Your skin will appear to be very swollen. This will go down over 48 hours.
- DO NOT: Scratch, pick, or scrape treatment area. Wear cotton gloves while sleeping if necessary.
- DO NOT: let treatment area dry out (this will lead to scabbing and could lead to scarring).
- DO NOT: expose healing area to the sun. Strict zero sun exposure for 2 weeks.
- WATCH FOR: Increased redness (some is to be expected).
- WATCH FOR: Increased pain.
- WATCH FOR: Increased heat.
- WATCH FOR: Thick yellow drainage from wound (clear, light oozing is completely normal and expected).
- WATCH FOR: Elevated body temperature.

FIRST 24 HOURS AFTER TREATMENT

- Apply Vaniply Ointment every 30 to 60 minutes. Do not allow skin to dry out.
- Use eye drops as necessary, Clear eyes/Refresh tears preferred. (ointment can melt into eye area and cause irritation)
- Cleanse before bed with Gentle Cleanser. (see wash instructions)
- Get up every 2-3 hours during the 2 first nights to reapply ointment.

DAYS 2-8 AFTER TREATMENT

- Cleanse with Gentle Cleanser 3-4 times a day. (see wash instructions)
- Use Vinegar Wash spray bottle to gently mist face. allow to sit for 2-4 minutes, pat dry. (store in fridge)
- Immediately after vinegar wash, apply thick layer of Vaniply Ointment.
- Continue to apply Vaniply Ointment 2-3 times as needed until next face wash.
- Further instructions will be provided at your post-op visit.
